

For Immediate Release

CHI-LLC Selects Visual Technology Services' PDF3D® Solution for Use with Herman Miller's Z-Axis™ 3D Software

Software for space planning and configuration of office furniture to be enhanced with PDF3D.

London, UK – September 1, 2010 – Visual Technology Services is proud to announce a partnership with Seattle-based CHI-LLC, an office furniture configuration company, to incorporate PDF3D® technology into Herman Miller's Z-Axis™ 3D configuration and visualization software for salespeople and designers in the office furniture industry.

The Z-Axis™ 3D design application immerses clients in stunning 3D visuals for managing their office furniture space with ease, and incorporating PDF3D® technology (www.pdf3d.co.uk) will improve further how designers and salespeople work with their customers and open new avenues for sharing and collaborating on projects.

“One of the significant factors in our decision to go with VTS was their customer support and attentiveness”, said Scott Jones, Chief Technology Officer of CHI-LLC. “When selecting a technology partner, especially for a strategic feature, it's vital that we find one who is dependable and competent and we are delighted to have acquired a package so tailor-made to our needs. We're very excited about the differentiation this will give us.”

“We are delighted with the new active technology partnership with **CHI-LLC**, using the functionality of PDF3D to enhance their product with richly interactive PDFs” comments Ian Curington, CEO of Visual Technology Services. “Our cutting-edge technology will really bring the designs of Z-Axis™ clients to life. We anticipate a long-term partnership in light of the growing demand of PDF3D for collaborative 3D graphics.”
